

Genus AgiliTeams™

Tungsten Automation (formerly Kofax) TotalAgility® Integration for Microsoft Teams

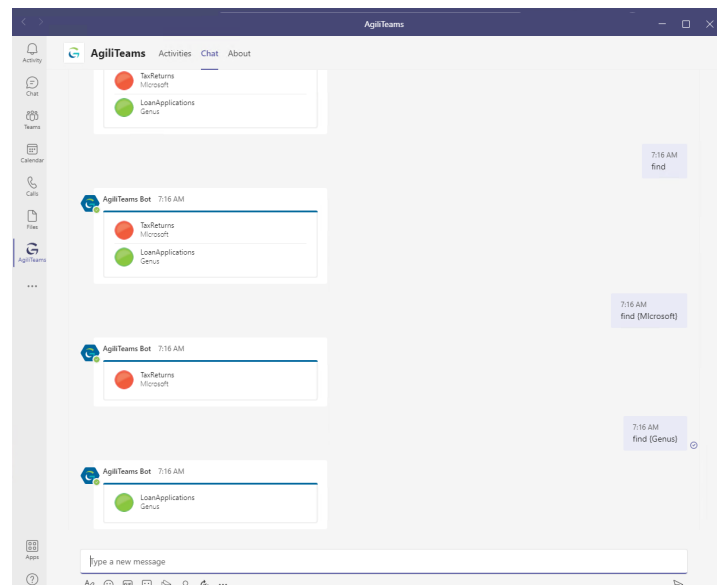

Enable a New Way of Working

AgiliTeams™, the integration of Tungsten Automation (formerly Kofax) TotalAgility® for Microsoft Teams, is a Teams App that delivers TotalAgility work queue management capabilities in the workspace many workers rely on most of the business day. Empower your organization to work within the Microsoft Teams user-friendly interface where staff can easily communicate, collaborate, and accomplish more than was ever possible with disconnected user experiences.

Do All Your Work Within A Single Interface

- > Give users a choice of working in the TotalAgility interface or from Microsoft Teams.
- > Chat directly with TotalAgility. Ask the BOT questions and get immediate answers.
- > Launch AgiliTeams directly from the Teams app bar.
- > Reduce context switching and stay focused for increased productivity.
- > Collaborate with co-workers via chat or calls to quickly answer any question.
- > Assign work to yourself and others from the work list or from chat.
- > Work from anywhere with AgiliTeams - desktop, web, or mobile.

ABOUT US
