IBM Cloud Pak for Business Automation Workshop

GENUS TECHNOLOGIES

It's time to get the most out of your IBM FileNet investment. Much of the time, software implementations remain static. This represents a missed opportunity to streamline business processes, add efficiencies, and reduce costs with enhancements such as cloud or containerization.

During this workshop, Genus specialists collaborate with your team to focus on your goals to maximize the capabilities you have in place and outline enhancements for future-state possibilities.

The Approach

Workshops allow your team to collaborate with subject matter experts and business stakeholders to get the most out of your software investment. Some key workshop activities include:

> An assessment of the current state of your IBM FileNet environment

> A discussion of your business and efficiency goals

> A review of your current processes

> An understanding of IT infrastructure goals as it relates to scalability, cloud, and containers

> A discussion of IBM Cloud Pak for Business Automation as it relates to goals

> Mapping of system capabilities to your goals and processes

> Development of a roadmap for deploying any planned upgrades or initiatives

Deliverables

A report that provides:

> Recommendations for transformation and migration to cloud and containers

> A prioritized list of potential enhancements

> A recommended roadmap and specifications linked to your business goals

Benefits

> An improved understanding of future possibilities with your IBM FileNet system

> A strategic view of the benefits related to future upgrades, scalability, and resiliency as it relates to your goals

> An outline of how IBM Cloud Pak for Automation may be implemented within your infrastructure

> A clear outline of future-state possibilities

Getting Started

The IBM Cloud Pak for Business Automation Workshop may be customized for the specific needs of your organization.
