

Genus Konnect Cloud Scanning by Genus Technologies

About Genus Konnect Cloud Scanning

Seamless Integration

> Secure scanning from anywhere directly into ServiceNow's Now Platform workflows.

Streamlined Workflows

> Automatically capture documents into any Now Platform workflow.

Cost Savings and Efficiency

> Eliminate the need for PCs – use cloud-based solution and manage scanners centrally.

Easy Setup

> Quick installation using a QR code in seconds, with no technical assistance required.

Real-Time Verification

> Get instant notifications on the scanner for data verification.

High-Capacity

> Scan up to 80 pages at a time with ease.

Versatile Applications

> Suitable for various industries including invoice processing, transportation, accounting, insurance, healthcare, HR, and customer accounts.

Revolutionize your scanning processes with our cutting-edge solution. With Kodak Alaris INfuse network scanners, cloud-based management software, and the power of Genus Konnect, securely scan from anywhere directly into ServiceNow's Now Platform.

Genus Konnect empowers you to scan from anywhere, securely deliver content directly into Now Platform work queues, and receive real-time user notifications on the scanner for ultimate verification.

Ideal for organizations with highly distributed scanning requirements, Konnect streamlines processes, cuts costs, verifies processing and improves remote management of the scanning environment. With applications ranging from invoice processing to healthcare and customer accounts, Konnect is the solution for distributed scanning made easy.

Easy to Set Up!

The setup couldn't be more straightforward. Once the scanner is unpacked and connected to the network, scan a QR code sheet to complete an automatic installation in about 15 seconds, with no technical assistance required. The QR code will include your specific configuration and jobs for your environment.

With the solution already configured for your organization's specific needs, an employee can walk up to the scanner, feed up to 80 pages, and select the named scan button. When scanning is complete, a message on the scanner interface verifies that the Now Platform has received the data.

Say goodbye to inefficient processes to get documents into your workflows and hello to seamless, secure, and real-time scanning with Kodak Alaris and Genus Konnect.

Key Features

- **Seamlessly Integrate with ServiceNow's Now Platform:**
 - > Secure scanning from anywhere directly into workflows.
- **Streamlined Workflows:**
 - > Capture documents directly into any Now Platform workflow process.
- **Cost Savings and Efficiency:**
 - > Cut costs by removing PCs and using the cloud-based solution. Manage your scanner fleet through centralized management and set up remote scanners easily.
- **Wide Range of Applications:**
 - > The Genus scanning solution serves diverse industries, such as Healthcare, Insurance, Accounting, Invoice Processing, Transportation, HR, and Customer Accounts.

ServiceNow Integration

The application contains only tables, views, and security constraints. No code is needed. Table data is filled by an external application using the ServiceNow Table API.
