

Intelligent Automation (IA): The New Age of AI-Powered Data-Driven Business is Here

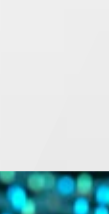

With the ever-growing volume of structured and unstructured data, businesses are driving transformation, efficiency and productivity with the support of AI-Powered Intelligent Automation (IA) technology.

32%

Organizations that implement IA realize an average of **32%** in cost reductions.¹

Today's leading IA platforms...

Tungsten TotalAgility® is an integrated platform for automating content-intensive workflows, bringing together:

Intelligent Document Processing (IDP)

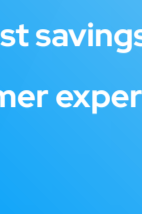

Process Orchestration

Robotic Process Automation (RPA)

Natural Language Interfaces

Generative AI

So that businesses can achieve organization-wide optimizations, including:

- ✓ Improved operational efficiency
- ✓ Increased employee productivity and proficiency
- ✓ Generation of cost savings
- ✓ Enhanced customer experience
- ✓ Stronger ROI

TotalAgility provides various deployment options from Tungsten public cloud to your preferred cloud service, enabling you to choose what suits your organization best.

How does Tungsten Automation deliver organizational optimization?

Step one: Acquire

Transforming unstructured data into actionable insights

97%

of organizations are investing in data initiatives, yet only...

26.5%

report that they've become a data-driven organization.²

Intelligent document processing (IDP) can help organizations accelerate their move to data-driven operations, automating the acquisition and extraction of data from any paper or digital source.

Web

Emails

Chats

Handwriting

Complex tables

Mobile

Databases

Images & PDFs

To ensure you're extracting maximum value, Tungsten Automation's platform even tackles unstructured data sources.

By taking control of your data, it's possible to:

- ✓ Unlock previously unobtainable insights
- ✓ Democratize business intelligence
- ✓ Maximize operational efficiency

Unlock your data's value faster with Tungsten Automation

Tungsten's IDP technology processes documents and data with the highest accuracy and speed, ensuring you can rapidly acquire the data needed to power real-time insights for better decision-making.

Here's what Zinnov Zones had to say...

Tungsten Automation's comprehensive approach to Automation, anchored by Intelligent Document Processing and Low Code workflow automation... have established its leadership in the automation ecosystem.

Step two: Analyze

Redefining decision-making with real-time business insights

For today's businesses, smarter and faster decision-making is driven by having accurate insights available on demand.

80%

of companies report revenue uplift due to real-time data analytics.³

Yet, only **23%** of data-driven insights are produced in real time.⁴

23%

Support your decision-making by using IDP to carve a smarter path to your insights for:

A 360-degree overview of system-wide data

Faster time to insights

Intelligent, connected ecosystem

Tungsten's IA platform uses an open-architecture approach with multiple deployment options, ensuring businesses unlock:

Real-time insights

Concise and detail-driven summaries, powered by rapid data analysis technology.

Sentiment analysis

Accurate customer and employee perspectives, unlocked through comprehensive analysis.

Here's what Everest Group had to say...

Everest Group named Tungsten Automation a Leader in 2023 Intelligent Document Processing Products PEAK Matrix® Assessment for the fifth year in a row.

Step three: Act

Powering productivity and elevating efficiency

Automation tools are making a huge difference in the day-to-day work of employees.

≥90%

report improved productivity

85%

report enhanced collaboration

≈90%

report expedited, error-free outcomes and decision-making⁵

Coordinate, orchestrate and manage

With a best-in-class IA solution, businesses can harness the potential of process orchestration, ensuring organization-wide processes are automated and streamlined.

With Tungsten's low-code IA platform for non-technical users, you can harness APIs for seamless integration with your existing systems, instead of a costly transformation project, achieving:

Faster time to value

Better business outcomes

Simplified and optimized processes

Tungsten: A leader in process orchestration

Tungsten Automation was named a Leader and a Star Performer in Everest Group's 2023 Process Orchestration Products PEAK Matrix® Assessment.

Innovative new features

The latest features of TotalAgility 8 transforms how people interact with automation software, with the launch of a new suite of Generative AI-powered Copilots.

An intuitive, natural language interface simplifies how workflows and solutions are created and how enterprises derive insights from their data.

Acquire is enhanced by: Copilot for Extraction

Dramatically reduces time and effort required to create and manage document extraction models, saving hundreds of hours of setup and maintenance time.

Analyze is enhanced by: Copilot for Insights

Generates actionable, real-time insights from proprietary business and case data, accelerating decision-making workforce productivity.

Action is enhanced by: Copilot for Development

Leverages generative-AI to transform ideas into working processes, case definitions, forms, business rules, and data models.

Tungsten Automation: Committed to your transformation

Tungsten Automation is the trusted industry leader for digital workflow transformations.

25,000+

Global customers

Patents and counting

We combine our rich technical expertise with Tungsten Automation's future-ready IA platform. Together we harness the power of AI and generative AI to transform workflows.

IA underpins successful workflow transformations across numerous industries, including:

Banking and financial

Manufacturing

Insurance

Healthcare

Government and public sector

Supply chain and logistics

Get in touch with our team to discuss how we can help you leverage Tungsten Automation's Intelligent Automation Platform to seamlessly automate data-intensive workflows across your business-critical operations.
